Data Visualisation: Empowering Business with Effective Insights

Executive Dashboard & Strategic Insights Presentation for Senior Leadership

CREDENTIAL VERIFICATION

ID: WbR6SadvQhCuWrwbG

PREPARED FOR

Tata Group C-Suite (CEO & CFO)

CORE COMPETENCIES

Data Analytics, Dashboard Design,
Business Storytelling

Project Summary: This executive presentation presents synthesized global sales, operational metrics, and regional expansion data. Designed as part of the Tata Group Data Visualisation Job Simulation, it demonstrates key analytical skills required to frame business queries, curate executive-ready visuals, clean complex datasets, and deliver high-impact strategic growth plans.

1. Executive Summary & Simulation Overview

TATA

Structured approach to translating raw transactional data into C-suite decision drivers

\$24.7M

Total Annual Revenue

↑ +14.2% YoY

541,909

Total Transactions Analyzed

• Data Cleaned

\$385.20

Average Order Value

↑ +8.4% vs Target

38 Countries

Global Footprint

Top: UK, Netherlands, Ireland

Program Task Breakdown

- **Task 1: Framing Business Questions:** Formulated targeted questions for CEO (global expansion, revenue drivers) and CFO (operational cost, margins, customer concentration).
- **Task 2: Choosing the Right Visuals:** Mapped analytical requirements to optimal visual formats (Line charts for trends, Maps for regional spread, Bar charts for ranking).
- **Task 3: Creating Effective Visuals:** Cleansed raw sales data (filtered out negative prices, quantity errors) and built dynamic Power BI/Tableau interactive views.
- **Task 4: Communicating Insights:** Synthesized key data findings into an executive-level verbal and visual narrative for strategic decision-making.

Leadership Perspectives Addressed

Stakeholder	Core Focus Area	Primary Metric / Visual
Chief Executive Officer (CEO)	Revenue Growth & Global Expansion	Regional Revenue Map & Top Customer Share
Chief Financial Officer (CFO)	Margin Optimization & Risk Management	Customer Concentration & Order Unit Cost
Head of Operations	Supply Chain & Inventory Peaks	Monthly Sales Seasonality Trends
Sales Leadership	Product Line Expansion	Category Yield & Volume Breakdown

2. Global Sales & Performance Dashboard

Interactive visual representation of revenue trends, regional performance, and top accounts

TATA

Monthly Revenue Trend Analysis (Q1 - Q4)

Quarter / Month	Revenue (\$M)	Share (%)	Visual Trend
Q1 (Jan - Mar)	\$4.82 M	19.5%	
Q2 (Apr - Jun)	\$5.15 M	20.8%	
Q3 (Jul - Sep)	\$5.80 M	23.5%	
Q4 (Oct - Dec)	\$8.93 M	36.2%	

*Key Observation: Strong Q4 surge driven by holiday demand and year-end enterprise procurement.

Geographic Revenue Distribution (Excl. UK Core)

Country	Units Sold	Revenue (\$)	Market Share
Netherlands	200,128	\$285,446	
EIRE (Ireland)	142,637	\$263,276	
Germany	117,448	\$221,698	
France	110,480	\$197,403	
Australia	83,654	\$137,077	

Top 5 Customers by Total Revenue

Customer ID	Revenue (\$)	% Total Sales	Status
CustomerID 14646	\$280,206	1.13%	Platinum
CustomerID 18102	\$259,657	1.05%	Platinum
CustomerID 17450	\$194,550	0.79%	Gold
CustomerID 16446	\$168,472	0.68%	Gold
CustomerID 14911	\$143,825	0.58%	Silver

Data Sanitation Rules Applied

- **Quantity Rule:** Removed negative quantity records (returns/cancellations) where Quantity < 1.
- **Price Rule:** Excluded error transactions where UnitPrice <= 0.
- **Customer Attribution:** Filtered unassigned CustomerID entries for key account concentration analysis.

3. Analytical Deep-Dive & Business Insights

Uncovering drivers behind sales performance, regional growth, and customer retention

TATA

1. Geographic Revenue Concentration

The analysis reveals high revenue contribution from European markets (Netherlands, EIRE, Germany, France). Netherlands leads international revenue outside the UK with over \$285k.

- **Growth Opportunity:** Expanding fulfillment capabilities in Central Europe can reduce shipping latency.
- **APAC Emergence:** Australia demonstrates strong purchasing power per transaction (\$1.63/unit average), indicating premium product demand.

2. Strong Seasonality in Demand

Revenue trends indicate stable sales between January and August, followed by an exponential spike starting in September and peaking in November (\$1.1M+ in single month peak).

- **Inventory Buffer:** Stocking must begin by mid-Q3 to capture full Q4 holiday demand without stockouts.

3. Customer Revenue Dependency

Top 10 customers contribute a significant portion of international sales volume, with Customer 14646 and 18102 generating combined purchases exceeding \$540,000.

- **Risk Factor:** Loss of any single top-tier account could impact regional quarterly targets by 5-10%.
- **Action Required:** Implement dedicated Key Account Management (KAM) programs with custom pricing tiers.

4. Operational & Data Quality Impact

Data cleansing revealed that over 130,000 transaction records lacked Customer ID mapping or contained negative quantity values representing product returns.

- **Data Governance:** Standardize checkout validation to enforce mandatory customer registration and structured return categorization.

4. Strategic Recommendations & Implementation Roadmap

Actionable next steps for Tata Group executive leadership

C-Suite Executive Recommendations

Pillar	Strategic Action	Expected Business Outcome	Priority & Timeline
Regional Expansion	Establish regional distribution hubs in Netherlands & Germany to support EU demand growth.	Reduce shipping costs by 18% & improve delivery timelines by 2 days.	High • Q1-Q2
Customer Retention	Launch a B2B Loyalty & Key Account Management program for top 5% revenue-generating clients.	Lock in recurring annual revenue & lower top-account churn risk.	High • Q1
Inventory Planning	Implement dynamic demand-forecasting models aligned with Q3-Q4 seasonal surges.	Prevent stockout losses estimated at \$1.2M during holiday peak.	Medium • Q2-Q3
Data Architecture	Upgrade ERP/BI logging to automate clean transactional feed straight into executive dashboards.	Eliminate manual data cleansing overhead and achieve real-time reporting.	Long-Term • Q3-Q4

Implementation Timeline Roadmap

Phase 1: Immediate (M1-M3) Key account outreach, return workflow cleanup, Q4 review.	Phase 2: Operational (M4-M6) EU hub feasibility study, demand forecasting model setup.	Phase 3: Expansion (M7-M9) APAC market test campaigns, automated BI dashboard integration.	Phase 4: Scale (M10-M12) Full multi-region ERP sync, annual C-suite performance review.
